

# Instructions for Using the Search and Selecting a Client to View Results

The **Search** feature in BrandSek allows you to quickly find a client and view their specific results.

---

## Step 1: Access the Dashboard

1. Log in to the BrandSek platform.
  2. Navigate to the **Dashboard** from the side menu.
- 

## Step 2: Use the Search Feature

1. Look at the **top right-hand side** of the dashboard.
  2. In the **Search bar**, type the name of the client you wish to find.
  3. As you type, the system will display a list of matching clients in the **Search Result** section.
- 

## Step 3: Select a Client

1. From the search results, locate the client you are interested in.
  2. Click on the client's name to select it.
- 

## Step 4: View Client Results

1. Once selected, the client's details and results will be displayed.
  2. This includes:
    - **Overall Security Health Score**
    - Key metrics such as **Attack Surface Management**, **Data Exposure**, and **Brand Security** scores.
    - A summary of **Top Issues**, such as vulnerable domains or certificates.
-

## Additional Tips:

- Use the search feature to quickly access client-specific data without scrolling through the full list.
- Clicking on individual metrics or issues in the client's results may provide more detailed insights.

By using the search and selection feature, you can streamline your workflow and efficiently review the security status of a specific client.
